PPP to bolster healthcare ecosystem in India: NATHEALTH

By PTI | 10 Jun, 2016, 03:06PM IST

NEW DELHI: Healthcare ecosystem in India will be significantly strengthened based on the public-private partnership (PPP) model, the apex body of healthcare providers, NATHEALTH, today said.

PPP model has also been advocated by NITI Aayog to improve health services in the country against the backdrop of dismal performance of public hospitals at the district level, the healthcare federation said in a statement.

"We expect the government’s initiative to promote PPP model to become a gamechanger and hope that the body to promote innovative PPP models as envisaged by Niti Aayog will be in place soon," NATHEALTH president Rahul Khosla said.

PPP mechanism could potentially be applied to a vast range of medical areas such as tertiary/secondary care, primary care, preventive systems, wellness, medical education, dialysis and the like as well as to provide wider and deeper coverage beyond urban India, he added.
"... we believe there are significant opportunities to further strengthen and simplify the PPP framework with several dimensions, including the tendering process, defining clear measures of success, enabling a conducive financial environment and developing a comprehensive governance framework," NATHEALTH Secretary General Anjan Bose said.

DSCI appoints Rama Vedashree as CEO

TOI Tech | Jun 2, 2016, 10.01 PM IST

Vedashree was previously the vice president at Nasscom, where she led all the initiatives regarding domestic IT, eGovernance and smart cities, among others. She also led the healthcare initiative in partnership with Apex Health Sector body, NatHealth.

NATHEALTH calls for reviewing model of healthcare sector in India

By Sukant Singh

New Delhi, June 10 (ANI): India has witnessed many big changes in the health sector over the past several years, but the health care needs of the country especially the affordability and easy accessibility still remains a challenge.

NATHEALTH, the apex association of Indian healthcare providers, on Friday said it is time to review the model of healthcare sector in India and bring the government's attention on the Public Private Partnership (PPP), adding the actionable interventions with regard to regulatory changes could significantly improve the entire healthcare ecosystem in the country.

In an exclusive interaction with ANI, NATHEALTH secretary general Anjan Bose said the Public Private Partnership (PPP) will strengthen the entire healthcare ecosystem, adding it is time to review the model of healthcare sector in India.

"We need to review how the PPP models can act as a game changer and become a success in the health care sector. For instance, China's healthcare model is largely publicly financed programme. India is one of the countries that spend the least on
the healthcare sector with a public spending of around one percent of the GDP as compared to three percent in China," he added.

Bose further said the Draft National Health Policy 2015 also envisages raising progressively the public health expenditure to 2.5 percent of the GDP.

"There should be increase in the healthcare sector's allocation in the Union Budget to at least three percent," he added.

Commenting on Prime Minister Narendra Modi's vision of Digital India and adaptation of best practices in the healthcare sector across the country, Bose said information technology has played an important role towards achieving digital health and equitable access of health to all.

"Digital Health care is a project we started two years back. Using digital technology like cloud computing, we are able to provide quality health care in rural areas. Doctors being able to reach to the patients through mobile app is one such element. Also there would be time when the world will not have enough hospitals especially for old-age and senior citizens. Hence, home care facility will be another trend in the making," he said.

"It is time we need metamorphosis from cure based care to preventive and wellness based care. If we can forecast the disease and come out with solutions than it would benefit the state and would lead to reduction of disease by 30 percent," he added.

PPP model can strengthen health care in India: NATHEALTH

POST 10 JUNE 2016

BS RAWAT

New Delhi: The apex body of health care providers, NATHEALTH, has said that the health care ecosystem in India will be significantly strengthened based on the public-private partnership (PPP) model.

PPP model has also been advocated by NITI Aayog to improve health services in the country against the backdrop of dismal performance of public hospitals at the district level, the health care federation said in a statement.

NATHEALTH’s ‘Aarogya Bharat 2025’ report recommends that India should have an ecosystem that better supports private investment in health care.

The recommendations include PPP to expand infrastructure, Design a unique PPP framework relevant to the health care sector and standardize concessionaire agreements and also establish an independent agency responsible for managing PPP's with monitoring of execution.

"We expect the government's initiative to promote PPP model to become a game-changer and hope that the body will promote innovative PPP models as envisaged by Niti Aayog," NATHEALTH president Rahul Khosla said.

“We look forward to working closely and supporting the Government in this initiative towards achieving quality and universal health care at all levels”, said Khosla.

This is a radical shift from the current system where the government funds pay salaries to physicians and specialists only in the Primary Health Centers.

At the secondary level, choice and competition are seen as cost-effective options. Community health centers and
private nursing homes could both be offered incentives by the government for efficient treatment and whoever provides better services will get more attractive compensation.

NATHEALTH strongly advocates that access to health care for all Indians could be made possible through the suggested model with a nominal increase in the health care sector’s allocation in the Union Budget if the Indian economy continues to grow 7-7.5% in the next several years.

“NATHEALTH’s ‘Aarogya Bharat 2025’ report encourages the build-out of health care infrastructure beyond the metros and in under served areas with appropriate incentives and public-private partnerships”, informed Anjan Bose, Secretary General, NATHEALTH.

Rahul Khosla elected president of NATHEALTH

POST 01 APRIL 2016

BS RAWAT

New Delhi: Max Group CMD Rahul Khosla has been elected as the President and Dr. Lal PathLabs CMD Brig. Dr Arvind Lal, as the Senior Vice President of the Healthcare apex body, NATHEALTH.

Khosla, succeeds Sushobhan Dasgupta, MD, Johnson and Johnson Medical India, and VP, Diabetes Care Asia Pacific.

A NATHEALTH statement informs that OE Healthcare President & CEO, India & South Asia, Milan Rao, has been elected as the Vice-President, while BD Managing Director Yaran Khanna is the new Secretary.

Daljit Singh of Fortis Healthcare has been elected as the Treasurer.

Speaking to DTMT, Rahul Khosla said, “At NATHEALTH, we have established a unique collaborative platform to usher progress healthcare as a priority sector. We look forward to developing and implementing a comprehensive plan to achieve the vision of universal and consistent healthcare in India.”

Khosla further said that the government and private healthcare providers need to work in tandem to develop a cohesive blueprint for healthcare provision and funding.

“There are wonderful opportunities to improve infrastructure, talent, regional outreach and consistency in access, affordability and quality of the Indian healthcare ecosystem,” the new president of NATHEALTH said.

“Private healthcare providers, with the help of government, need to work in tandem to develop a solid blueprint for healthcare provision and funding,” Khosla added.

PPP Model will strengthen the entire healthcare ecosystem: NATHEALTH

By EH News Bureau on June 13, 2016

Government think tank NITI Aayog has also advocated the Public Private Partnership (PPP) model to improve health services in the country

NATHEALTH (The Healthcare Federation of India), today said that the government’s attention on Public Private Partnership (PPP) and actionable interventions with regard to regulatory changes could significantly improve the entire healthcare ecosystem in the country.

NATHEALTH’s ‘Aarogya Bharat 2025’ report recommends that India should have an ecosystem that better supports private investment in healthcare. The recommendations include –

1. PPP’s to expand infrastructure, manage government delivery, improve financing, R&D, technology infusion and adherence to quality standards.

2. Design a unique PPP framework relevant to the healthcare sector and standardise concessionaire agreements.

3. Establish an independent agency responsible for managing PPP’s, and monitoring execution.

“We need to work in a collaborative mode to overcome public private trust deficit”, said Anjan Bose, Secretary General, NATHEALTH.

Government think tank NITI Aayog has also advocated the Public Private Partnership (PPP) model to improve health services in the country against the backdrop of dismal performance of public hospitals at district level. NitiAayog advocates forming a body to promote innovative PPP models.
“NATHEALTH is very positive about the potential for PPP models to significantly improve healthcare infrastructure and delivery in India. We expect the Government’s initiative to promote PPP models to become a game changer and hope that the body to promote innovative PPP models, as envisaged by Niti Aayog, will be in place soon. PPP models could potentially be applied to a vast range of medical areas such as tertiary/secondary care, primary care, preventive systems, wellness, medical education, dialysis etc., as well as to provide wider and deeper coverage beyond urban India. We look forward to working closely and supporting the Government in this initiative towards achieving quality and universal healthcare at all levels,” said Rahul Khosla, President, NATHEALTH and President Max Group.

In addition, Niti Aayog has recommended outsourcing of primary healthcare to private doctors and promoting competition between government and private hospitals at the secondary level, which involves services of medical specialists.

This is a radical shift from the current system where the government funds pay salaries to physicians and specialists only in the (Primary Health Centers) PHCs. At the secondary level, choice and competition are seen as cost-effective options. Community health centers and private nursing homes could both be offered incentives by the government for efficient treatment and whoever provides better services will get more attractive compensation.

NATHEALTH strongly advocates that access to healthcare for all Indians could be made possible through the suggested model with a nominal increase in the healthcare sector’s allocation in the Union Budget if the Indian economy continues to grow 7-7.5 per cent in the next several years.

“NATHEALTH’s ‘Arogya Bharat 2025’ report encourages the build-out of healthcare infrastructure beyond the metros and in underserved areas with appropriate incentives and public-private partnerships”, informed Bose.
Universal Healthcare remains a big challenge. The draft National Health Policy 2015 mentions that 63 million Indians face poverty due to health expenses every year. “We need to scale up and expand current programmes to control Non Communicable Diseases (NCDs) with integrated care offerings across screening, treatment and follow-up, enabled by partnerships, e.g. private-private, public-private and across delivery, insurance, technology and pharmaceutical sectors of the healthcare industry,” said Khosla.

“NATHEALTH members have participated in several PPPs within the healthcare space. Based on our collective experience, we believe there are significant opportunities to strengthen and simplify the PPP framework along several dimensions including tendering process, defining clear measures of success, enabling a conducive financial environment and developing a comprehensive governance framework. This will be a win-win for all stake holders and enable us to collectively achieve the dream of Universal Healthcare,” concluded Bose.

DSCI appoints Rama Vedashree as CEO

Jun 02, 2016, 22:01 IST

NEW DELHI: IT industry body Nasscom's data protection wing - Data Security Council of India (DSCI), today announced the appointment of Rama Vedashree as the new CEO. Vedashree succeeds Nandkumar Saravade.

Vedashree was previously the vice president at Nasscom, where she led all the initiatives regarding domestic IT, eGovernance and smart cities, among others. She also led the healthcare initiative in partnership with Apex Health Sector body, NatHealth.

Rama Vedashree has an extensive experience of over 25 years, having worked at NIIT Technologies, Microsoft and General Electric (GE) India before.

Increasing incidents of cyber attacks and data protection efforts globally are expected to create $35 billion in revenue and employment opportunities for about a million professionals by 2025 for India, according to Nasscom.

Last year, Nasscom had set up a task force aimed at positioning India as the global hub for providing cyber security solutions as well as for developing cyber security R&D plans and a skilled workforce of cyber security experts.

In April, Nasscom, along with Data Security Council of India (DSCI) and security software firm Symantec, launched the 'National Occupational Standards' for 10 cyber security job roles, aimed at creating a pool of certified cyber security professionals in the country.

Firefox Bikes supports young Indian to embark his world journey on wheels

India Infoline News Service | Mumbai | June 09, 2016 12:23 IST

The campaign is popularly known to be “V for World Peace” Campaign. The journey is aimed to cover 80+ countries, 5 continents, 700+ cities, which is almost 90,000 kilometers and will reach out to approximately 10,000,000 people.

Firefox Bikes, a leading premium bike brand is supporting, 28 year old Cyclist Abhishek Kumar Sharma, in his journey on two wheels around the world. The journey starts tomorrow from Frankfurt, Germany. The traveler has done a Bharat Bhraman for the Swachh Bharat Abhiyaan and has been recognized by Prime Minister of India, for his contribution.

The ‘Around the world on bicycle tour’ aims at Climate Change and World Peace Awareness program. Cycling being the most energy efficient urban transport mode has a high potential to reduce energy consumption and to enhance the livability. Anyone can get partway to carbon neutrality through how they live their life as reduction of energy consumption directly leads to reduction of used carbon footprints. The campaign is popularly known to be “V for World Peace” Campaign. The journey is aimed to cover 80+ countries, 5 Continents, 700+ Cities, which is almost 90,000 kilometers and will reach out to approximately 10,000,000 people.
Abhishek Kumar Sharma is a World Traveler, Environmentalist, Cyclist, Storyteller and Dreamer.

He is tempting to spread awareness among students of schools, colleges, universities and also encourage these institutions to start a chapter on CLIMATE CHANGE & WORLD PEACE awareness program, promote the yoga and meditation importance for everyone to live happier and healthier life.

To popularize environment-health friendly cycling, Firefox Bikes has always supported such environment friendly efforts and campaigns by sports-environment enthusiasts. In line with this the company would be supporting Sharma’s campaign in all possible ways.

Shiv Inder Singh, CEO, Firefox Bikes said, “Abhishek Kumar Sharma’s thought provoking words and action only prove that there is so much more goodness in the world. His passion for cycling and belief to be the reason to create a change, can ignite anyone to work towards the same path. He is one of his kind. I wish him good luck for his journey and I know he will create the best and positive impact on people across the globe as he aims to.”

Bose further said the Draft National Health Policy 2015 also envisages raising progressively the public health expenditure to 2.5 percent of the GDP.

"There should be increase in the healthcare sector's allocation in the Union Budget to at least three percent," he added.

Commenting on Prime Minister Narendra Modi's vision of Digital India and adaptation of best practices in the healthcare sector across the country, Bose said information technology has played an important role towards achieving digital health and equitable access of health to all.

"Digital Health care is a project we started two years back. Using digital technology like cloud computing, we are able to provide quality health care in rural areas. Doctors being able to reach to the patients through mobile app is one such element. Also there would be time when the world will not have enough hospitals especially for old-age and senior citizens. Hence, home care facility will be another trend in the making," he said.

"It is time we need metamorphosis from cure based care to preventive and wellness based care. If we can forecast the disease and come out with solutions than it would benefit the state and would lead to reduction of disease by 30 percent," he added. (ANI)
PPP to bolster healthcare ecosystem in India: NATHEALTH

Healthcare ecosystem in India will be significantly strengthened based on the public-private partnership (PPP) model, the apex body of healthcare providers, NATHEALTH, said on June 10.

PPP model has also been advocated by NITI Aayog to improve health services in the country against the backdrop of dismal performance of public hospitals at the district level, the healthcare federation said in a statement.

“We expect the government’s initiative to promote PPP model to become a gamechanger and hope that the body to promote innovative PPP models as envisaged by Niti Aayog will be in place soon,” NATHEALTH president Rahul Khosla said.

PPP mechanism could potentially be applied to a vast range of medical areas such as tertiary/secondary care, primary care, preventive systems, wellness, medical education, dialysis and the like as well as to provide wider and deeper coverage beyond urban India, he added.

“...we believe there are significant opportunities to further strengthen and simplify the PPP framework with several dimensions, including the tendering process, defining clear measures of success, enabling a conducive financial environment and developing a comprehensive governance framework,” NATHEALTH Secretary General Anjan Bose said.

This will be “a win-win situation” for all stakeholders and enable us to collectively achieve the dream of universal healthcare, he added.

NATHEALTH calls for reviewing model of healthcare sector in India

June 10, 2016 Health, Lifestyle, News 0 Comments

New Delhi: India has witnessed many big changes in the health sector over the past several years, but the health care needs of the country especially the affordability and easy accessibility still remains a challenge.

NATHEALTH, the apex association of Indian healthcare providers, on Friday said it is time to review the model of healthcare sector in India and bring the government’s attention on the Public Private Partnership (PPP), adding the actionable interventions with regard to regulatory changes could significantly improve the entire healthcare ecosystem in the country.

In an exclusive interaction with ANI, NATHEALTH secretary general Anjan Bose said the Public Private Partnership (PPP) will strengthen the entire healthcare ecosystem, adding it is time to review the model of healthcare sector in India.
“We need to review how the PPP models can act as a game changer and become a success in the health care sector. For instance, China’s healthcare model is largely publicly financed programme. India is one of the countries that spend the least on the healthcare sector with a public spending of around one percent of the GDP as compared to three percent in China,” he added.

Bose further said the Draft National Health Policy 2015 also envisages raising progressively the public health expenditure to 2.5 percent of the GDP.

“There should be increase in the healthcare sector’s allocation in the Union Budget to at least three percent,” he added.

Commenting on Prime Minister Narendra Modi’s vision of Digital India and adaptation of best practices in the healthcare sector across the country, Bose said information technology has played an important role towards achieving digital health and equitable access of health to all.

“Digital Health care is a project we started two years back. Using digital technology like cloud computing, we are able to provide quality health care in rural areas. Doctors being able to reach to the patients through mobile app is one such element. Also there would be time when the world will not have enough hospitals especially for old-age and senior citizens. Hence, home care facility will be another trend in the making,” he said.

“It is time we need metamorphosis from cure based care to preventive and wellness based care. If we can forecast the disease and come out with solutions than it would benefit the state and would lead to reduction of disease by 30 percent,” he added. (ANI)

Data Security Council of India (DSCI) appointed Rama Vedashree, as Chief Executive Officer. She succeeds Mr. Nandkumar Saravade for this role.

R Chandrashekhar, President NASSCOM said “we are delighted to appoint Rama Vedashree as CEO of DSCI. Over the years, DSCI has positioned itself as the key industry body in Data Protection and Cyber Security. At this juncture when DSCI charter is envisaged with a strategic focus on Cyber Security, I am confident that Rama’s Industry experience will enable DSCI evolve a strategic outlook in areas of public advocacy, thought leadership, Industry development and capacity building in Cyber Security.”

Gopal Pillai, former Home Secretary and Chairman, DSCI, commented, “We are pleased to welcome Rama as part of DSCI. Her rich experience working with Government and industry will greatly benefit DSCI and contribute significantly in carrying forward the DSCI charter to the next level.”

Rama Vedashree who joined DSCI said “I feel privileged to be given the opportunity to lead DSCI in achieving its vision to be the premier industry body for making Cyber Security an integral pillar of the Digital Transformation that India is witnessing. DSCI team and I, will build on the foundation built over the last eight years, and partner with industry and government to make India a Global Hub for Cyber security products and services”
DSCI will continue to focus on policy advocacy and raising the maturity of information security across the industry, strengthening linkages between the government and industry to address specific issues, talent development, implementation of government policies, plans and projects in India and abroad, amongst others.

Rama Vedashree was Vice President, NASSCOM leading all initiatives in Domestic IT, eGovernance, and Smart Cities among others. She was also leading the Healthcare initiative in partnership with the Apex Health Sector body, NATHEALTH and had been anchoring new initiative of NASSCOM on making India a global hub for Cyber Security. She has extensive experience of over 25 years working, having worked at NIIT Technologies, Microsoft and General Electric (GE) India. She is a Gold Medalist from the University of Hyderabad and has also completed an Executive Education, program at Harvard Business School, and a short program in High Performance Computing at Cornell University.

Nasscom’s data protection wing DSCI appoints Rama Vedashree as CEO

Vedashree was previously the vice president at Nasscom, where she led all the initiatives regarding domestic IT, eGovernance and smart cities, among others. TOI Tech | 03 June 2016, 8:40 AM IST

IT industry body Nasscom's data protection wing - Data Security Council of India (DSCI), today announced the appointment of Rama Vedashree as the new CEO. Vedashree succeeds Nandkumar Saravade.

Vedashree was previously the vice president at Nasscom, where she led all the initiatives regarding domestic IT, eGovernance and smart cities, among others. She also led the healthcare initiative in partnership with Apex Health Sector body, NatHealth.

Rama Vedashree has an extensive experience of over 25 years, having worked at NIIT Technologies, Microsoft and General Electric (GE) India before.

Increasing incidents of cyber attacks and data protection efforts globally are expected to create $35 billion in revenue and employment opportunities for about a million professionals by 2025 for India, according to Nasscom.

Last year, Nasscom had set up a task force aimed at positioning India as the global hub for providing cyber security solutions as well as for developing
cyber security R&D plans and a skilled workforce of cyber security experts.

In April, Nasscom, along with Data Security Council of India (DSCI) and security software firm Symantec, launched the 'National Occupational Standards' for 10 cyber security job roles, aimed at creating a pool of certified cyber security professionals in the country.

पीपीपी मॉडल से मजबूत होगा स्वास्थ्य सेवा तंत्र : नेटहेल्थ

नयी दिल्ली 10 जून (वार्ता) स्वास्थ्य सेवा प्रदाता कंपनियों के शीर्ष संगठन भारतीय स्वास्थ्य सेवा संघ (नेटहेल्थ) ने देश के दूर-दराज क्षेत्रों तक स्वास्थ्य सेवाएँ पहुँचाने के लिए सार्वजनिक-निजी साझेदारी (पीपीपी) को मजबूत बनाने की वकालत करते हुये कहा है कि नियामक बदलाव से इस क्षेत्र को बेहतर बनाया जा सकता है।

नेटहेल्थ ने आरोग्य भारत 2025 रिपोर्ट में कहा है कि देश में एक तंत्र होना चाहिए जो स्वास्थ्य सेवा में निजी निवेश का बेहतर तरीके से समर्थन करे। उसने कहा है कि पीपीपी का ऐसा मॉडल तैयार किया जाना चाहिए जो स्वास्थ्य सेवा क्षेत्र और उपभोक्ताओं के हितों के अनुकूल हो। पीपीपी के लिए एक स्वतंत्र एजेंशी की स्थापना किये जाने की सिफारिश करते हुये संगठन ने कहा कि पीपीपी की मूल सुविधाओं को विस्तारित करना, सरकारी आपूर्ति का प्रबंधन करना, वित्त सहायता, शोध एवं विकास , तकनीकी संचार आदि को गुणवत्ता मानकों तक बेहतर बनाना इसका मुख्य उद्देश्य होना चाहिए।
